

Gravity Generators

Aam gwood to tha theewing! Hewwp mee dowwwn!

- Pressurized
- Aural
- Projector

Pressurized

Cost □3 <1

Provides adjustable gravity to all pressurized modules on the ship. Can be toggled/configured at any steering module or gravity generator module.

Aural

Cost $\square 4$ $\diamond 1$ $\nearrow 1$

Can "gravitize" depressurized parts on the inside of the ship. Gravity can be set to up to 2Gs, halving the speed of people and mechs on board.

Projector

Cost $\square 5$ $\diamond 2$ $\text{✂} 2$

Can project a gravity bubble extending up to 20 tiles away from the ship, allowing normal or halved movement depending on the gravity setting without the need for magnetic plating. It also circumvents the gravitational pull of planets, negating any extreme factors and reducing the ship's effective size class by 1. Not stackable.
